

I researched a lot on John Deere. Then I started to put it on my website. I got pictures and from many different websites. I made the website the way that looks the best to me. I did a lot of work on the website on setting it up and getting it to how I like it. The research was easy because I know a lot about his and I grow up around John Deere tractors. John Deere is one of the most important man in history. He change how the plow worked. I had to work had to get the website the best way.
